

GC Audio – RE VR INHERIT CARTRIDGE:

Thank you for purchasing the REVR Inherit Cartridge.
We hope you have as much fun using it as we had designing it !

The REVR cartridge is a reissue of the preamplifier of a famous British mixer from the 80s. Many improvements have been made to achieve better results.

- Low noise Operational amplifier.
- Great care on PCB Routing.
- Rebuilt of TF10015 transformer with same technical data.

We recommend it for sound engineer looking for very punch recording and warmth on low frequency.
