

m303s

the world's finest active DI, now in

(((((STEREO))))))

"I've owned and used a lot of DI boxes over the years, and I can genuinely say that the m303 is the best I've heard."

-Hugh Robjohns / SOS

"Overall, the m303 delivered a balanced tone that brought the sound of my instrument to life without adding extra color. It also produced an exceptional richness to the sound of my bass guitar. The low end was deep, defined, and punchy."

-Danielle Goldsmith, TapeOp

"Low-end feels clear and true while maintaining natural and not over-hyped high-end brilliance. So far, we haven't found much that the m303 can't do."

-Nic Faddy, Grand Ole Opry

The all-new **m303s** is an active, truly-isolated stereo direct box, delivering next-generation audio performance for all live stage and studio applications. Our advanced power supply design provides incredible headroom and dynamic range. Custom-wound Lundahl transformers output amazing low-end clarity and high frequency detail. All of this performance is packaged in beautiful and rugged 1/4" extruded aluminum chassis. Don't let the elegant exterior fool you, these things are built.

- Stereo version of the m303
- Unmatched transparent, musical audio performance
- Massive headroom - handles a wide array of signal levels coming off the stage
- Incredibly low distortion and noise
- Active design with true galvanic isolation - NO NOISE
- 2x world-class Lundahl output transformers
- Deep, rock-solid bass response
- 1M Ohm input impedance, perfect for passive pickups
- Designed and built for years of reliability
- Backed by a 5 year warranty
- Made in the USA
